Project Description

Our project aims to help family-owned restaurant owners manage their restaurant with more ease, while keeping up a good stream of business. The product is a culmination of a Point Of Sales (POS) system, reservation service, real-time restaurant traffic measurement tool, and interactive system for customers. From the point of view of the restaurant owners, they are able to manage all customer service facilities from one place, giving them and their staff more time to focus on customer service. From the point of view of the customer, no more boring, endless wait times. Our product will make waiting a more interactive and entertaining experience by supplying customers with various panels of interfaces regarding their dining experience.

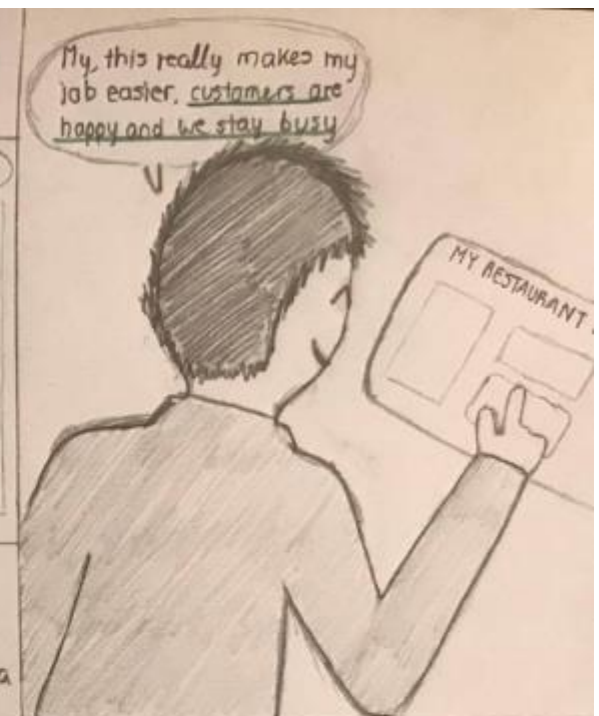

RESTAURANTS WITH OUR POS SYSTEM

✓

SAMPLES	WHAT'S IN MY FOOD?	HOW LONG?
	Nutrition 	Queue 1. Anna - 2 (15)
		2. Ian - 3 (20)
		3. Lili - 6 (25)
		4. Cris - 4 (30)

Customers are able to have a more interactive and entertaining experience with various panels along the waiting area
